

eColloq Series on Cyberlearning

Discuss research, don't travel

eColloq Series on Cyberlearning

Discuss research, don't travel

Objectives

- **Community building:** Supporting the efforts of CIRCL, the Center for Innovative Research in Cyberlearning
- **Outreach:** Make your projects known to a broader audience, including teachers

Method

- Two eColloqs per semester
- Each with two presentations
- Each presentation 20 minutes, followed by 20 minutes of online discussion
- You could organize a local viewing with discussion – a sort of “science café” for which you would get the eColloq speakers for free

If you are interested to present, please contact m.hoffmann@gatech.edu or wmartin@edc.org

eColloq Series on Cyberlearning

Discuss research, don't travel

October 24, 2017: Implicit Learning Assessments & Pedagogical Agents

We Know More Than We Can Tell:
Differentiation through Implicit Learning
Assessments

Jodi Asbell-Clarke,

TERC, the Technical Education Research Center in
Cambridge, MA

Research on Pedagogical Agents: How
Making Computers More Human-like
Can Improve Learning

H. Chad Lane,

University of Illinois at Champaign-Urbana

Next eColloq: probably Nov 30 with

- **Katie Headrick Taylor**, University of Washington,
- **Tom Moher**, University of Illinois at Chicago
